Subject: Re: Ashton crossroads

Dear Council Member,

Ashton very much needs the commerce planned for Ashton Meeting Place. This requires the improvement of the Ashton intersection. Your support for this project will bring forth manifold advantages to the northeastern county and to the environment: improved commercial outlets for a fast-growing area, enormous fuel savings resulting from nearby facilities, an enhanced sense of community for the area, and the final resolving of a protracted community schism.

The community has struggled long and hard to reach agreement on development, and it has succeeded. Only the highway improvement stands in the way. The community has met its responsibilities, and the project deserves completion. Thank you for your consideration.

Thomas Y. Canby
